🕒 9:00 am - 6:00 pm daily

🗨 Language: German

💰 Regular price:
1122.00€ plus VAT.

🕒 Early bird discount (until 8 weeks):
1122.00€ plus VAT.

Advice: This course is also available as a 4-day training in English and German language

In this foundation level seminar, you learn the most important software testing terms and principles. Step by Step, we go through all the stages of the software testing process, from the planning to the specification to the testing and to the documentation of tests. We address professional test methods and show how they are connected methodically.

This course teaches the curriculum contents of the ISTQB® within three days. We also offer you a 4-day course in English or German language with plenty of time for hands-on scenarios and discussions. If you are interested in a more in depth exchange of experiences with your trainer and your fellow course participants, then we highly recommend to book our [4-day training](#) course.

Many of our trainers are active members of ISTQB member boards and are very familiar with the curriculum content. In addition, all have many years of teaching experience in the field of software testing and as coaches and team members in both small and large projects in a wide range of industry sectors.

exam

optional
