🕒 60 minutes

📝 Test type:  
multiple choice

💰 Examination Fee:  
200.00€ plus VAT.

*Advice: Exam available in German, English, Spanish language*

In our Design Sprint Workshop we bring in all our experiences from projects with focus on Design Thinking, Agile Developments, UX Design and customer communication. We follow the Google Ventures framework for Design Sprints and make workshop participants fit for this approach. Of course we set up our own in-house projects the same way we teach it to our customers - from understanding the current situation to a promising idea and testing a finished prototype with real customers. This enables us to achieve rapid, repeatable innovation cycles and make companies fit for their future and today's fast-moving markets.

The course teaches the entire sprint process. With the help of a real practical example we take you step by step through the individual sprint stages and let you feel how good and at the same time how challenging Design Sprints feels. After the course you will have an understanding of how a Design Sprint works, when it is applicable and what upfront preparation is necessary. Moreover we equip you with additional information on how to run your first Design Sprint and how to refine your facilitator techniques constantly.

Our trainers all have over 20 years of professional experience from large and small (software) projects in various industries. Find out more about our speakers [here](#).
