Advice: Non-native speakers are eligible for additional exam time

In this ISTQB® advanced level seminar, we will familiarize you with the test management and all planning and control tasks, and the methods for dealing with these tasks. Besides the integration of testing activities in the software lifecycle, we will address the special demands on the tester's personality.

The course teaches the ISTQB® curriculum in 5 days. We will examine the entire test process, its phases, tasks and results, and make sure that you will be able to manage the quality assurance of software products.

All our trainers have many years of experience in the field of software testing, and a have track record as consultants in small and big projects.

Watch our five-minute video in German language to get a good overview on the course: https://youtu.be/NAaaBGJOgMg
