In this ISTQB® Exam Preparation Boot Camp, we repeat the most important terms of software testing and go through all stated of the software testing process once again ranging from the planning to the specifications to the execution and the documentation of tests. We also repeat the professional test techniques and their methods.

The Bootcamp course is designed to refresh the contents of the ISTQB® curriculum and to prepare you for the one-hour exam. We will discuss sample questions from Mock Exams and we respond to the interests and questions of the participants. In addition, we show opportunities to quickly understand the structure of exam questions and scenarios, and to recognise distractors.

All our trainers have many years of experience in the field of software testing, and a have track record as consultants in small and big projects. Due to their experience, our trainers are able to address learning contents, where more training graduates have difficulties.
