 Regulärer Preis:
1495.00€ zzgl. MwSt.

 Frühbucher (bis 8 Wochen):
1345.50€ zzgl. MwSt.

Hinweis: Kursunterlagen in englischer Sprache

Selenium is a suite of different tools meant for browser automation, including Selenium WebDriver and Selenium Grid. Although not limited to be used for testing web applications, it has become the most sought-after tool by software testers. With support for all of the widely used browsers, it has also grown beyond just being another software testing library. It is the backbone of countless browser automation tools, APIs and frameworks. The WebDriver interface introduced by Selenium WebDriver is under review for becoming a W3C standard, which would further increase its importance in the space of test automation.

About the course

SeU - Certified Selenium Engineer (CSE) is a practitioner level course for testers involved in web test automation. The course covers Selenium as a browser automation library from the ground up and includes coverage of advanced concepts such as page object design, custom implementation of listeners etc. Test automation constructs and design are kept to a minimum to better focus on code constructs that enable usage of Selenium in a properly designed manner. This course, together with future test automation design-focused courses from Selenium United, provides testing practitioners everything that is required to become successful test automation engineers in the web test automation space.
